

Instructor-Led

Amadeus Altéa DC Aircraft Engineering and Business Database General Refresher

This one-day training is a refresher of the initial Amadeus Altéa DC Aircraft Engineering and Business Data DBM training. The content is a pre-defined high-level training, limited to some of the more complex concepts of the initial training that may be difficult to follow by referencing the user guide only.

On this course, you will learn about the:

- > Development of appropriate aircraft engineering data (review).
- > Process of entering such data into the database using the DBM (review).
- > Engineering/mathematical functions within Flight Management (FM) that are essential to the development of aircraft database configurations (review).
- > Data-building philosophy (review).
- > Testing and preimplementation acceptance processes including any regulatory considerations (review).

This course covers the following topics:

- > Overview of general data concepts
- > Overview of cargo hold data and processing
- > Overview of fuel data and processing
- > Overview of Center of Gravity data and processing
- > Overview of flight creation

Certification:
No

Duration:
1 day

Language:
English

Level:
Advanced

Pre-requisite:
Yes

Pework:
No

Is this the course for you?

This course is for:

- > Airlines hosted on Altéa Flight Management.
- > Airline staff responsible for the development of engineering limitations data.
- > Airline staff responsible for importing and maintenance of carrier and aircraft data used for weight and balance functions of Flight Management.

Things you need for this course

Pre-requisite:

- > Have attended the initial Amadeus Altéa DC Aircraft Engineering and Business Database course (4 days).

This course helps you use

- > Altéa Departure Control - Flight Management (FM)
