The last few details...

Important to note: The Amadeus FareXpert filing platform is a set of applications (modules) which enable real-time filing into the Amadeus database. For productivity and consistency purposes, all applications have been grouped under this platform. Every FareXpert based module addresses a specific filing need and thus targets potentially very different audiences. It is therefore key to clearly identify to which FareXpert module reference is being made. The Amadeus FareXpert Dynamic Fares training course is covering the FareXpert based Promotions module.
