Altéa Revenue Availability With Active Valuation

As an agent, learn about boosting your sales and 'bookability' with real-time Origin and Destination availability, computing with the whole PNR context, and protecting your critical O&D revenues with married segment control functionality.

On this course, you will learn:

- > What is revenue management?
- > What Amadeus products are involved in the revenue optimisation process?
- > What is revenue optimisation?
- > How to distribute seat availability
- > What is the difference between basic and advanced inventory controls?
- > What is revenue availability?
- > What is active valuation?
- > What is a yield?
- > What is a bid price?
- > What is married segment control?

Through a set of videos learn how to calculate revenue availability, retrieve and adjust yield in Altéa Inventory (INV), identify different types of bid price and how yield works with bid price using Altéa Revenue Availability With Active Valuation (RAAV).
