

Instructor-Led

Amadeus Availability Management

This course describes how to use Amadeus Availability Management to differentiate your availability offer in line with your customer and market segmentation. By applying revenue management controls at channel level, availability information can be tailored to individual points-of-sale.

On this course, you will learn to:

- > Create and maintain points-of-sale.
- > Set up flight groups.
- > Define markets.
- > Construct class suppression, polling, AVS-driven rules, and functional access control rules.
- > Read the history and restore historical items.
- > Request access authorisation.

This course covers the following topics:

- > Creating and maintaining Point-of-Sale keyword definitions to target standard Amadeus users, internet users and users in reverse access.
- > Achieving desired distribution levels by creating and modifying class suppression rules, setting up AVS-driven rules, and maintaining polling rules for dynamic availability.
- > Retrieving and reading the history.
- > Certification test

Certification:

Yes - pass mark: 85%

Duration:

2.5 days

Language:

English

Level:

Certification

Pre-requisite:

Yes
