Instructor-Led

Amadeus Altéa Document Management for Altéa Departure Control

This course explains how to set up device and print management for Altéa carriers using DCS.

On this course you will learn how to:
> Set up devices for ground handling and printing at the airport.
> Set up predefined print formats and associate them.

This course covers the following topics:
> Concepts used in Device Administration.
> Completing the 5-step fixed-registration process.
> Determining the printing flows to retrieve various print devices.
> Setting up shared printers (host sharing).
> Completing the 4-step auto-registration process.
> Creating a location description and zones to utilise them in Customer Management.
> Identifying and adding available format associations.
> Viewing print queues within the queue application.
> Security and access for Document Manager.
