

Instructor-Led

Amadeus Altéa Inventory Overview for FM Standalone

This course will provide a brief overview of Altéa inventory and its impact on Altéa Departure Control. As a Flight Management standalone customer, you will learn how to create schedules, how to create Aircraft Configuration Versions (ACV), and how to build seat maps.

In this course, you will learn:

- > How to navigate Altéa Inventory.
- > What the interactions between Altéa Inventory and Altéa Departure Control - Flight Management are.
- > How to resolve basic schedule problems

This course covers the following topics:

- > Work with Messenger in Altéa Inventory.
- > Create ACVs and seat maps.
- > Create schedule business rules.
- > Check schedule history.
- > Access and update the List of Period window.
- > Access the teletype message window.
- > Set up time-initiated action (TIA) rules to trigger Altéa Departure Control flight creation business rules.
- > Investigate and resolve locked flight periods.
